Comments

Choose a suitable place for your ventilator ensuring that there are no obstructions above or below the deck.

Using parts as a template mark and cut hole through deck / roof / hatch.

Trial fit suitable parts and screw into position. Ensure that they fit correctly before proceeding.

Remove them and refit using a suitable marine sealant, wait until the sealant hardens.

Ensure that the floating balls and the housings for the free floating balls are clear of debris and excess sealant.

Fit O-rings.

Complete assembly.

Each set is supplied with complete assembly guide.

air-only ventilators®

Warranty

We warrant our products to be free of defects in workmanships & materials under normal use & standard installation.

Our quality is proven and it comes from well thought-out design and our use of the finest materials available worldwide.

Exceptional properties of materials:

- no weathering,
- no ageing,
